

Lesson 4 Hands-On

Directions

This Hands-On will be graded, so make sure you complete each part.

Pick a topic that you are interested in, and create a survey about that topic. Ensure that you look for questions on the topic before making them up, and if you do need to make up your own questions, remember to choose the right question types and follow the rules of designing your own survey questions!

High School Student Feedback Survey about experiences at school

Although you do not have to test your survey, create a plan for testing it and write it down.

Have each teacher in the school district survey their students, less than 5 mins that it should take

You will then add this survey on Survey Monkey, and attach the text document of your survey as well as the web link it can be found at on Survey Monkey in your final submission.
